

ITEM	VALUE
UseCase	gather behaviour
Summary	The system gathers data about the user behaviour
Actor	System, User
Precondition	The user is logged in.
Postcondition	The user's behaviour is registered
Base Sequence	1. The user watches a video, gives feedback on video or searches for a video. 2. The system registers user behaviour
Branch Sequence	1. The user changes their preferences (as described in "manage preferences" use case description) 2. The system registers the change and updates changed preferences, to provide actual recommendations
Exception Sequence	
Sub UseCase	create recommendations
Note	Feedback: like, dislike
